HEALTH INFORMATION TECHNOLOGY
Health Data Analyst
(CIP 51.0707)
Level I Certificate

The Health Information Technology – **Health Data Analyst Level I Certificate** is designed to prepare the student for an entry-level clerical position in a medical record or health information management department. Students who graduate with the Level I Certificate will possess knowledge of medical terminology and requirements for the collection, storage, and retrieval of medical record content for varying types of medical facilities. TSI readiness or other testing is not required for this Level I Certificate. TSI readiness is required for continuation into the Level II Certificate or Associate of Applied Science (AAS) Degree.

If a student successfully completes the Health Data Analyst Certificate and decides to continue with the EHR Support Specialist Certificate or the AAS degree in Health Information Technology, most of the certificate courses will transfer.

Admission Criteria: The Health Data Analyst Level I Certificate is open enrollment. Students will fill out an interest form and submit it to the Program Director.
