

Blackboard Mobile Learn

Accessing Blackboard through Your Mobile Devices

Blackboard Mobile Learn takes interactive teaching and learning to the mobile device, giving students and teachers instant access to their courses, content, and communities anywhere.

What Can You Do With Blackboard Mobile Learn?

- **Announcements**

Assignment due? Class cancelled? This is the place where instructors go to post the news students need to know. Students have instant, on-the-go access to the latest announcements, and instructors can post announcements anywhere, anytime.

- **Discussions**

The Discussion Board is a key course communication tool for engaging students and promoting learning. It's the place students ask and answer questions, and where instructors can respond to one student for the benefit of all. With Blackboard Mobile Learn, instructors and students can review and post to threaded discussions, as well as create new threads, all while on the go.

- **Grades**

Want to know how you did on the midterm or your last homework assignment? Students can view their grades right here.

- **Blogs**

Read blog posts and interact with classmates by posting comments on their blogs or responding to comments on your own.

- **Roster**

Wondering who's in your class? With the class roster, you can quickly see your full class list, making organizing study groups a whole lot easier.

- **Journals**

Read and reflect on your Journal posts and those of your classmates. Both students and instructors can comment on Journals.

Limitations of Blackboard Mobile Learn

While the app does offer a native environment for accessing Blackboard course content on a mobile device, the underlying technology of whichever mobile device being used may limit the Blackboard features that can be accessed from the app. **The following features likely will not work properly when accessed from the app and therefore should only be used when accessing from a full browser on a computer:**

FACULTY

- adding new content to a course
- building tests, quizzes, and surveys
- grading assignments

STUDENTS

- submitting tests, quizzes, and surveys
- submitting assignments
- adjusting Grade Center options
- participating in chat or synchronous sessions
- viewing any Flash-based instructional content or movies

WCJC strongly discourages students from taking quizzes and tests or submitting course work through Blackboard using a mobile or handheld device (iPad, smartphone, etc.).

Frequently Asked Questions

What is Blackboard Mobile Learn?

Blackboard Mobile Learn allows students and faculty to access teaching and learning wherever and whenever they want on mobile devices. Blackboard Mobile Learn extends and enriches the course experience of Blackboard Learn, the leading web-based teaching and learning platform, in native mobile applications built for a range of mobile devices.
