Additional Course Information

Topical Outline: Each offering of this course must include the following topics (be sure to include information regarding lab, practicum, and clinical or other non-lecture instruction).

- I. Utilization of the nursing process to care for stable, uncomplicated patients in the health care environment under direct supervision of the clinical professional.
- II. Students are required to utilize the nursing skills learned in didactic courses safely and correctly.

Course Learning Outcomes:

Learning Outcomes – Upon successful completion of this course, students will:

As outlined in the learning plan, apply the theory, concepts, and skills involving specialized materials, tools, equipment, procedures, regulations, laws, and interactions within and among political, economic, environmental, social, and legal systems associated with the occupation and the business/industry.

Students will demonstrate legal and ethical behavior, safety practices, interpersonal and teamwork skills, and appropriate written and verbal communication skills using terminology of the occupation and the business/industry.

Methods of Assessment:

Client assignment and care in a health care facility, clinical proficiencies/simulation lab, clinical evaluation tool
