

Course Information

Course Title	Introduction to Industrial Maintenance
Course Prefix, Num. and Title	INMT 1305
Division & Department	Vocational Science: Manufacturing Technology
Course Type	WECM Course
Course Catalog Description	Basic mechanical skills and repair techniques common to most fields of industrial maintenance. Topics include precision measuring instruments and general safety rules common in industry, including lock-out/tag-out. The course also includes hand tool usage, screws, threads, interpretation of mechanical drawings, tolerances and settings, machinery/mechanical components, couplings and clutches, and materials for mechanical applications.
Pre-Requisites	TSI requirements met.
Co-Requisites	None

Semester Credit Hours

Total Semester Credit Hours	3
Lecture Hours	2
Equated Pay Hours	3.5
Lab/Other Hours	3
Lab/Other Hours Breakdown: Lab Hours	3
Lab/Other Hours Breakdown: Clinical Hours	Enter Clinical Hours Here.
Lab/Other Hours Breakdown: Practicum Hours	Enter Practicum Hours Here.
Other Hours Breakdown	3

Additional Course Information

Topical Outline: Each offering of this course must include the following topics (be sure to include information regarding lab, practicum, and clinical or other non-lecture instruction).

Topical Outline -> Dedicated Instructional Time

- IMTME028-GCU -> Correct use of tools -> 4 Hrs .
- IMTME015-GCU -> Interpretation of Mechanical Drawings -> 12 Hrs.
- IMTME012-GCU -> Lubrication -> 16 Hrs .
- IMTME010-GCU -> Materials for mechanical applications -> 4 Hrs.
- IMTME026-GCU -> Screws and Threads -> 8 Hrs .
- IMTME027-GCU -> Tolerances and settings -> 8 Hrs .
- IMTME035-GCU -> Mechanical elements for Non-Specialists -> 12 Hrs .
- IMTME005-GCU -> Couplings and Clutches -> 8 Hrs .
- IHS002-GCU -> Lock out-Tag out -> 8 Hrs .

Lab: This course will feature hands-on lab to enhance the lectures.

Course Learning Outcomes:

Learning Outcomes – Upon successful completion of this course, students will:

1. Select the correct tools and use safely tools (hand and power tools).
2. Utilize precision measuring instruments.
3. Interpret mechanical drawings.
4. Apply the concepts of proper lubrication.
5. Identify materials used for mechanical applications.
6. Identify and install different types of screws and threads.
7. Apply and check tolerances and settings.
8. Identify and maintain mechanical elements (basics for Non-Specialists).
9. Troubleshoot and repair couplings and clutches.
10. Perform Lock out/Tag out safety requirements.

Methods of Assessment:

Periodic written quizzes and exams.

Hands-on laboratory assessments.

Exam / hands-on performance analysis will be performed to identify weaknesses in the program.

Required text(s), optional text(s) and/or materials to be supplied by the student:

Industry hand-outs and selected text.

Suggested Course Maximum:

20

List any specific or physical requirements beyond a typical classroom required to teach the course.

Associated lab requirements.

Course Requirements/Grading System: Describe any course specific requirements such as research papers or reading assignments and the generalized grading format for the course.

1. Quizzes, homework, assignments, and class participation – 25%
2. Lab, and cross disciplinary skills (work ethic, safety, teamwork, housekeeping, attitude). – 25%

3. Mid-term exam – 25%

4. Final Exam – 25%

Grading.

A – 100-90

B – 89-80

C – 79-70

Curriculum Checklist:

- Academic General Education Course** (from ACGM, but not in WCJC Core) – No additional documents needed.
- Academic WCJC Core Course.** Attach the Core Curriculum Review Forms
 - Critical Thinking
 - Communication
 - Empirical & Quantitative Skills
 - Teamwork
 - Social Responsibility
 - Personal Responsibility
- WECM Course** -If needed, revise the Program SCANS Matrix and Competencies Checklist
