Additional Course Information

Topical Outline: Each offering of this course must include the following topics (be sure to include information regarding lab, practicum, and clinical or other non-lecture instruction).

- Basic hardware components of computer systems
- Basic software components of computer systems
- Windows Operating System and file and folder management
- Access the Internet using a web browser to conduct a search
- Creation, editing and printing of documents using Microsoft Word
- Improve the appearance of documents by adding themes, clip art, formatting and bullets
- Creation of spreadsheets containing formulas using Microsoft Excel
- Creation of a presentation with Microsoft PowerPoint
- Improve the appearance of the presentation by adding design templates, transitions, clip art and formatting
- Creation and maintenance of a database including tables, forms and reports using Microsoft Access
 - Simple queries of database

Course Learning Outcomes:

Learning Outcomes – Upon successful completion of this course, students will:

Upon successful completion of this course, students will:

1. Describe the fundamentals of information technology concepts – hardware, software, security, and privacy.
2. Demonstrate proper file management techniques to manipulate electronic files and folders in local, network, and online environments.
3. Create business documents with word processing software using spelling and grammar check, format and layout, tables, citations, graphics, and mail merge.
4. Create business documents and analyze data with spreadsheet software using (1) tables, sorting, filtering, charts and graphics, pivot tables, macros; (2) statistical, financial, logical and look-up functions and formulas; and (3) add-ins.
5. Create business multimedia presentations with presentation software using templates, lists, groups, themes, colors, clip art, pictures, tables, transitions, animation, video, charts, and views.
6. Create databases and manage data with database software using tables, fields, relationships, indexes, keys, views, queries, forms, reports, and import/export functions.
7. Integrate business software applications.
8. Use web-based technologies to conduct ethical business research.
9. Use “goal seeking” and “what-if analysis” to solve problems and make adjustments/recommendations in a business environment.

Methods of Assessment:

Individual/Group Assignments
Individual/Group Projects
Reading Assignments
Presentations
Lab Works/Assignments
Quizzes/Tests/Exams

Required text(s), optional text(s) and/or materials to be supplied by the student:

Textbook:

Title: Microsoft Office 365: In Practice, 2019 Edition

Author: Randy Nordell

Online Access Code for SIMnet

You may use the e-book found within SIMnet

Publisher: McGraw Hill

Combo (Loose-leaf book and access code): WCJC ISBN: 9781264088836

Access Code Only: WCJC ISBN: 9781264088522

Loose-Leaf book ONLY (applicable if you purchased access code on-line): WCJC ISBN: 9781264111626

USB drive

Office 365 Education for Students is available free to students who attend academic institutions that have purchased Office for faculty and staff. It is available at [Link for Student Copy of Office 365/2019](#). This gives you access to Office 365 versions of Word, Excel, and PowerPoint but NOT Access (see note below).

Special Note: Access is required for this course but it is not part of the free software. It is not available for MAC's. MAC users should plan to use the lab computers for that unit. Windows users can consider downloading a trial copy from [MS Access Trial Version](#) but it is valid for only one month.

Suggested Course Maximum:

20

List any specific or physical requirements beyond a typical classroom required to teach the course.

A 64 bit computer for each student running Windows 10 client operating system and Microsoft Office 2019/365 (Word, Excel, Power Point, and Access) with an Internet connection.

A computer with the same software, internet access and data projector is needed for the instructor

Course Requirements/Grading System: Describe any course specific requirements such as research papers or reading assignments and the generalized grading format for the course.

35% - SIMnet Projects* (20)	20 – 50%
18% - SIMnet Lessons & Assignments* (20)	10 – 30%
5% - Quizzes (1 – BB, 1 – SIMnet) (4)	5 – 20%
2% - Graded Student Discussions (5)	0 – 10%
30% - Exams (5)	10 – 40%
10% - Final Exam (1)	0 – 10%
