

Purpose: It is the intention of this Administrative-Master Syllabus to provide a general description of the course, outline the required elements of the course and to lay the foundation for course assessment for the improvement of student learning, as specified by

Course Title – Crime in America
Course Prefix and Number – CRIJ 1307
Department – Criminal Justice

Division – SBS

Course Type: (check one)

- Academic General Education Course (from ACGM – but not in WCJC Core)
 Academic WCJC Core Course
 WECM course (This course is a Special Topics or Unique Needs Course: Y or N)

Semester Credit Hours # : Lecture hours# : Lab/other hours # 3:3:0

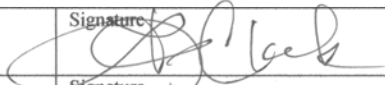

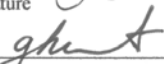

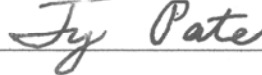

Equated Pay hours for course - 3

Course Catalog Description - Historical perspective on American crime, social and public policy factors affecting crime, social impact of crime and crime trends, social characteristics of specific crimes, and prevention of crime.

Prerequisites/Corequisites - THEA reading and writing requirements met

Approvals – *the contents of this document have been reviewed and are found to be accurate.*

List Lab/ Other Hours
Lab Hours
Clinical Hours
Practicum Hours
Other (list)

Prepared by Linda Foreman Clark	Signature 	Date 9-17-07
Department Head	Signature 	Date 9-17-07
Division Chair	Signature 	Date 9-17-07
Vice President	Signature 	Date 10-5-07

I. Topical Outline – Each offering of this course must include the following topics (be sure to include information regarding lab, practicum, clinical or other non lecture instruction):

- A. Expansive nature of the study of criminology
- B. Measuring Crime and Criminal Behavior
- C. Historical perspectives relevant to the study of criminology
- D. Psychological and Biological explanations
- E. Strain and Cultural Deviance Theories
- F. Subcultures
- G. Social Control Theory
- H. Labeling, Conflict, and Radical Theories
- I. Environmental Theory
- J. Violent Crime
- K. Property Crime
- L. White-Collar and Corporate Crime
- M. Public Order Crime
- N. International and Comparative Criminology

II. Course Learning Outcomes

Course Learning Outcome	Method of Assessment
<ol style="list-style-type: none"> 1. Ability to evaluate the importance of the study of criminology in today's society 2. Capacity to measure crime and interpret criminal behavior patterns 3. Capability of assessing the different schools of thought regarding criminal behavior and crime using a historical perspective 4. Skill to classify the psychological and biological perspectives of crime and criminal behavior 5. Aptitude for identifying the strain and cultural deviance theories 6. Ability to evaluate the formation of subcultures 7. Capacity to describe the social control theory 8. Facility to compare the relationship between perpetrators and victims of crime and to crime and criminal behavior 9. Capability of selecting alternative appropriate explanations of crime: such as labeling, conflict and radical theories 10. Aptitude for analyzing the concept of crime, classifying violent crimes 11. Skill for comparing various crimes against property 12. Ability to interpret the effect of organizational criminality. 13. Power to distinguish between different public order crimes such as drug-, alcohol-, and sex-related crimes 14. Power to utilize comparative criminology information 	<ol style="list-style-type: none"> 1. Participation in class discussions based on student research using library and newspaper databases 2. Use of statistical information in student research papers, testing based on text materials, participation in class discussion based on student research, homework assignments using statistical information 3. Testing based on text materials, research assignments 4. Testing based on text materials, research assignments 5. Testing based on text materials 6. Research assignment on gangs, Testing based on text material 7. Testing based on text material 8. Research assignment on crime victims, testing based on text material 9. Testing based on text materials and participation in class discussions on current crime problems and alternate explanations 10. Testing based on text materials, research assignment on Texas Penal Code 11. Examination of relevant portions of Texas Penal Code and participation in class discussions, testing based on text materials 12. Testing based on text material 13. Research assignment on prevalence of said crimes, participation in class discussion, testing on text materials 14. Research paper and testing on text materials

III. Required Text(s), Optional Text(s) and/or Materials to be Supplied by Student.

A. Freda Adler, Gerhard O.W. Mueller, William S. Laufer, *Criminology*, Sixth Edition, Boston, MA: McGraw Hill, 2007. ISBN 007312446X 139780073124469

Or

Walsh, Anthony and Ellis, Lee 2007 *Criminology An Interdisciplinary Approach*, Thousand Oaks, CA: Sage Publications ISBN 1412938406

Or

Vito, Gennaro F., Maahs, Jeffrey A., Holmes, Ronald M. 2007, Criminology Theory Research and Policy 2nd Edition, Boston, MA: Jones and Bartlett Publishers 0763730017

Or

A textbook of the department's choosing by reputable authors published by a reputable publisher that contains information on the topics outlined in section I.

IV. Suggested Course Maximum - 35

V. List any specific spatial or physical requirements beyond a typical classroom required to teach the course.

Internet access to social science databases and social science journals and Computers and printers for preparing assignments

VI. Course Requirements/Grading System – Describe any course specific requirements such as research papers or reading assignments and the generalized grading format for the course

Grading Policy:

Students in Criminal Justice courses must have a 70% average to receive a passing grade!

Grading System:

A = 90-100

B = 80-89

C = 70-79

F = 0-69

Four to six page research paper in APA style utilizing hypothesis based on course theories. Page number requirement does not include, the title page, references page, exhibits, appendices or other attachments (30% to 40% of grade)

Reading of course textbook – necessary for successful text performance and participation in many class discussions
Research relevant to course topics – necessary for many class discussions, homework assignments and research paper

Participation in class discussions based on the text and outside research (10% to 20% of final grade)

Comprehensive final (minimum of 10% of final grade)

Periodic testing over assigned reading (minimum of 30% of final grade)

Homework assignments – necessary to evaluate reading and research skills (10% to 20% of final grade)

Class attendance – interaction with instructor and other students necessary for success in course and college success in general (5% to 10% of final grade)

VII. Curriculum Checklist

- **Academic General Education Course** (from ACGM – but not in WCJC Core)
No additional documentation needed

- **Academic WCJC Core Course**
Attach the Core Curriculum Checklist, including the following:

- Basic Intellectual Competencies
- Perspectives
- Exemplary Educational Objectives

- **WECM Courses**
Attach the following:

- Program SCANS Matrix
- Course SCANS Competencies Checklist

Page 1: Competencies

Course Prefix & Number: CRIJ 1307	
Competency	Method of Assessment
READING: Reading at the college level means the ability to analyze and interpret a variety of printed materials – books, articles, and documents.	Textbooks used in the course vary between 400 and 500 pages, all pages are assigned for reading, students are required to read newspaper/magazine articles, journal articles, government publications relevant to course
WRITING: Competency in writing is the ability to produce clear, correct, and coherent prose adapted to purpose, occasion, and audience.	Students are required to submit written homework assignments and a research paper based on student research
SPEAKING: Competence in speaking is the ability to communicate orally in clear, coherent, and persuasive language appropriate to purpose, occasion, and audience.	Students are required to participate in class discussions and to discuss research assignments in class
LISTENING: Listening at the college level means the ability to analyze and interpret various forms of spoken communication.	Students participate in group discussions, follow instructions announced by instructor in order to perform satisfactorily in class
CRITICAL THINKING: Critical thinking embraces methods for applying both qualitative and quantitative skills analytically and creatively to subject matter in order to evaluate arguments and to construct alternative strategies.	Met by one or more of the following: essays on exams; collaborative group work; class discussions; scenario-based objective exam questions that require application of material. Students are required to analyze hypothetical situations and provide thoughtful appropriate analysis based on text materials and lecture. Students are required to defend his/her position on issue analysis and answers in class discussions. In his/her research paper the student formulates an hypothesis and attempts to prove said hypothesis with research.
COMPUTER LITERACY: Computer literacy at the college level means the ability to use computer-based technology in communicating, solving problems, and acquiring information.	Student assignments are required to be typewritten and the majority of research for assignments and the research paper utilizes the Internet.

Page 2: Perspectives

Course Prefix & Number: CRIJ 1307	
Perspective	Method of Assessment
1. Establish broad and multiple perspectives of the individual in relationship to the larger society and world in which he or she lives, and help the student to understand the responsibilities of living in a culturally- and ethically-diversified world;	Thoughtful analysis of research materials in discussion, written assignments and paper assessing ability to locate and recognize alternate explanations for behavior.
2. Stimulate a capacity to discuss and reflect upon individual, political, economic, and social aspects of life to understand ways to be a responsible member of society;	Research efforts, class discussions focusing on various explanations for crime.
3. Recognize the importance of maintaining health and wellness;	Specific focus on the effect of drugs and alcohol on crime and criminal behavior in text materials, testing, research and discussions.
4. Develop a capacity to use knowledge of how technology and science affect lives;	Assigned reading of text materials and research emphasizes the contribution of science in evaluation crime and criminals and text materials cover the recent phenomenon of technology being used by criminals. Student research demonstrates the use of technology to investigate crime and criminal behavior.
5. Develop personal values for ethical behavior;	Students demonstrate personal responsibility and ethical behavior by performance as a contributing member of the class. Text materials illustrate how some ethical breaches can easily become crimes. Discussion/lecture on plagiarism reinforces the need for ethics. Penalties for unethical/dishonest behavior additionally remind students of the need for upstanding behavior.
6. Develop the ability to make aesthetic judgments;	
7. Use logical reasoning in problem solving;	Critical thinking test questions force students to utilize logical reasoning and the research paper facilitates the use of logical reasoning for problem solving.
8. Integrate knowledge and understanding of the interrelationships of the scholarly disciplines	Testing over text materials, discussion of research assignments and the research paper encourage student to explore explanations for events that may be based on economics, politics, the law, psychology, group behavior. Writing assignments in class promote use of the writing disciplines. The use and analysis of statistical information demonstrates the need for mathematical ability and the sciences furnish explanations for much of the behavior studied in the course.

Page 3: Exemplary Educational Objectives

Course Prefix & Number: CRIJ 1307	
Component Area: Social and Behavioral Sciences	
Exemplary Educational Objective	Method of Assessment
1. Employ the appropriate methods, technologies, and data that social and behavioral scientists use to investigate the human condition.	Review and testing over text materials explaining methods and data used to investigate crime and criminal behavior. Students use similar techniques to gather and analyze information for research paper. Students demonstrate in class discussions their ability to analyze relevant data.
2. Examine social institutions and processes across a range of historical periods, social structures, and cultures.	Textbook materials review approaches to the study of crime in criminal behavior from the beginning of recorded history to the present. Students discuss pros and cons and trends in these approaches and how the culture and societal structure affected study. Students are also tested on their knowledge and ability to discriminate and choose appropriate methods.
3. Use and critique alternative explanatory systems or theories.	Critical thinking test questions, class discussions encourage students to recognize and use alternate theories for problem solving.
4. Develop and communicate alternative explanations or solutions for contemporary social issues.	Homework research assignments and class discussions facilitate exposure of alternate explanations and solutions for crime problems.
5. Analyze the effects of historical, social, political, economic, cultural, and global forces on the area under study.	Study of crime and criminal behavior necessitates examining changes over time and the effect of social institutions and disciplines as explanatory variables. As other institutions have been globalized, the pervasiveness of crime and criminal behavior and possible international explanations has increased. Text materials, testing and research assignments and discussion evaluate students' ability to recognize the foregoing.
6. Comprehend the origins and evolution of U.S. and Texas political systems, with a focus on the growth of political institutions, the constitutions of the U.S. and Texas, federalism, civil liberties, and civil and human rights.	In studying crime and criminal behavior knowledge and understanding of governmental control of behavior and criminal law is critical to students' ability to explain what happens in the criminal world. Tests and discussions evaluate the student's knowledge and ability to explain the influence of government and the law in evaluating crime and criminals.
7. Understand the evolution and current role of the U.S. in the world.	Extensive text material is devoted to comparison of the crime phenomena in the United States and other parts of the world. Students are tested on this material and research assignments support further exploration of difference between the U.S. and other countries.
8. Differentiate and analyze historical evidence (documentary and statistical) and differing viewpoints.	Text materials review how crime has been defined during different time periods and students research and examine crime, victim and perpetrator statistics from a variety of sources. Student findings are discussed in class and in research papers. Students are tested over text materials.
9. Recognize and apply reasonable criteria for the acceptability of historical evidence and social research.	Student research papers are based on reputable authored or government sources. Text materials compare information gathered from a variety of sources and students discuss deficiencies in source material and methods of analysis. Students are tested concerning favorable and unfavorable comparisons.

<p>10. Analyze, critically assess, and develop creative solutions to public policy issues.</p>	<p>Students reason out explanations for crime based on research findings and are asked to propose solutions. Presented with discouraging recidivism statistics, students during discussions and in research assignments are asked to provide new ideas that might reduce the incidence of criminal behavior.</p>
<p>11. Recognize and assume one's responsibility as a citizen in a democratic society by learning to think for oneself, by engaging in public discourse, and by obtaining information through the news media and other appropriate information sources about politics and public policy.</p>	<p>Student research assignments force students to investigate varied sources of information and must defend their findings in class discussions.</p>
<p>12. Identify and understand differences and commonalities within diverse cultures.</p>	<p>Not only is crime examined in a variety of cultures but explanations for crime offered in text materials are based on cultural differences. Examination of crime in other parts of the world also facilitates understanding of cultural influence. These differences are examined in class discussion and reviewed during testing.</p>
